

# ABRASIVOS MUNDI

## “50 years attending the National Industry”

**Abrasive wheel drive (League of Rubber)**  
For centerless grinding.

Our manufacturing system starts with an innovative treatment of the mixing process and ends with the output stabilization furnace controlled temperature and pressure. Thus is obtained a higher yield with a consistency that is constant throughout the lifetime of the product. All specifications are suitable for processes requiring high accuracy and consistency. In special applications, are used for grinding and polishing of aluminum parts, wheel manufactured in such cases, up to 400 mm. in diameter.

	mm.
<b>Diameters</b>	180-400
<b>Thicknesses</b>	To 350
<b>Grain</b>	46-280
